

Oswal Openwell Submersible

Horizontal submersible monoset pumpset for open wells, sumps and tanks · single & three phase

AT A GLANCE

- Horizontal monoset — runs submerged in open wells
- No suction trouble, no priming
- Water-lubricated bearings — maintenance free
- 0.5–3 HP single-phase · 0.5–10 HP three-phase
- Head 6–60 m · discharge up to 3500 L/min
- Vibration-free, noiseless operation

60 m

Agricultural & industrial range

Ushering in prosperity · horizontal monoset

OPENWELL SUBMERSIBLE PUMPSET · HORIZONTAL MONOSET

Submerged horizontal monosets — no suction trouble, no maintenance

Oswal horizontal submersible monosets are well known for quality, reliability and excellence in every type of service. They are manufactured under the supervision of a highly qualified technical team with stage-wise rigorous inspection under TQM concepts, and backed by excellent after-sales service.

Because the monoset works submerged in the open well or sump, there is no suction lift to overcome and no priming; water-lubricated bearings make the set practically maintenance free, and the world-class hydraulic design delivers higher discharge at low power consumption.

High efficiency

Low power consumption.

No suction trouble

Works submerged — complete absence of suction problems.

Maintenance free

Water-lubricated bearings.

Quiet

Vibration-free, noiseless operation.

Higher discharge

World-class pump design.

Specification

Details	Single phase	Three phase
Power range	0.5–3 HP	0.5–10 HP
Head	6–40 m	7–60 m
Discharge	60–1150 L/min	60–3500 L/min
Pipe size (suction × delivery)	25×25 mm – 100×100 mm	25×25 mm – 125 mm

Red: corrected — the source prints “255 mm” for the smallest single-phase pipe size; 25×25 mm matches the three-phase column.

Applications

- **Irrigation** — farms, drip and sprinkler irrigation, seed farms and nurseries.
- **Domestic water supply** — multi-storeyed buildings, industries and housing complexes.
- **Commercial water supply** — hotels, hospitals, service stations, lodgings, cooling-water circulation systems and government water-supply systems.

OSWAL HORIZONTAL OPENWELL MONOSET

Notes (as printed — confirm with factory): the largest three-phase pipe size is printed only as “125 mm” (the single-phase column uses suction × delivery, e.g. 100×100 mm). Detailed model-wise performance, materials and pumped-liquid limits are not given in the source leaflet — refer to the Oswal product catalogue or the factory. The manufacturer reserves the right to change design and specification without prior notice.
